Equation (52) in Appendix A is only valid for  $m_0 = m_1$ ; the general expression for the coefficient of mass diffusion is,

$$D = C_D \frac{3}{8nd_x^2} \sqrt{\frac{k_B T}{\pi m_x}}$$

as obtained from eqns. (7.4–38), (8.2–4), and (8.2–5) in [28].
